

Corpus Christi Army Depot

Skill Enhancement Opportunities:

- CCAD executes *high volume*, real world maintenance operations on both aircraft and secondary items
- Soldiers receive hands-on repetitive maintenance execution side by side with the highest skilled maintainers in the Army.
- In a 2 Week period, based on the production schedule, a Soldier could conduct 60 hours in:
 - Composite Repairs
 - Non Destructive Inspections
 - Repair and Fabrication Machine Work
 - Soldering Certifications
 - Heavy Sheet Metal Repair and Fabrication
 - Component Assembly and Theory of Operation

Keys to Success When Sending Soldiers to CCAD

- Senior Leader orientation of Depot capabilities
- Clearly define desired outcome early (i.e. type of maintenance desired)
- Plan for time outside CCAD duty hours (0600-1430)

CCAD Provides World Wide Readiness Support:

- Real time assistance, advice and reach- back capability for maintenance, logistics, aircraft recovery and battle/crash damage assessment, disposition, and preparation for shipment.
- Depot-level repairs to rotary winged aircraft with specialized equipment, tooling and parts.
